Professional Summary

- Senior AI Engineer & Full-Stack Developer with 14+ years of experience in designing scalable distributed systems, autonomous workflows, and high-performance applications.
- Deeply proficient in the MERN stack, specializing in architecting robust backends (Node.js, Nest.js, Python) and responsive frontends (React, Angular).
- Proven track record in Cloud-Native architectures (AWS), Serverless computing, and database design across PostgreSQL, MongoDB, and Amazon QLDB.
- Strong foundation in Performance Engineering, optimizing large-scale applications for speed, security, and resource efficiency.
- Experience in building Agentic AI Workflows using Python, LangChain, and CrewAI to automate complex enterprise reasoning tasks.
- Profile Link: <https://namrta-saxena.github.io/>

Technical Skills

- **Languages/Frameworks:** JavaScript (ES6+), TypeScript, React, Redux, Node.js, Nest.js, Express, Python.
- **Databases & Vector Stores:** PostgreSQL, MongoDB, MySQL, Redis, Pinecone/ChromaDB (Vector DBs).
- **AI & Data Science:** Agentic AI Frameworks (CrewAI, LangGraph), LLM Integration (OpenAI), RAG (Retrieval-Augmented Generation), LangChain, Python, Pandas, Scikit-learn.
- **Cloud & DevOps:** AWS (Lambda, QLDB), Docker, Git, Linux/Shell Scripting, CI/CD.
- **Legacy/Mobile:** Ionic, Android (Java), Cordova, React Native.

AI Projects

Autonomous Supply Chain Intelligence Agent (Agentic AI)

- Integrated a Research Agent to scrape global logistics news and a Reasoning Agent to predict potential project "Holds" based on supply chain disruptions.

Intelligent PDF Insight & Compliance Engine (RAG & Agentic)

- Architected a RAG-based system to automate the auditing of complex legal and technical documents.
- Automated the generation of executive summaries and compliance reports.

Professional Experience

Bechtel India Pvt. Ltd. | Lead Consultant

Noida | *Current*

- Architecting Supply Chain Systems (DSCS) focusing on material allocation and logistics tracking.
- Experience in data analysis and predicting potential issues and suggestions
- Creating dashboards and reports to display the results.
- Implemented high-performance features including complex filtering engines, performance decoupling, and SSO integration (SCVitals).
- **Tech:** React, Redux, Node.js, SQL, Redis, Python.

Assimilate Solutions | Senior Software Engineer

Noida | *Feb 2021 – Jan 2023*

- Designed **Serverless architectures** using AWS Lambda to automate product health-monitoring tasks.
- Developed secure database schemas using Amazon QLDB (Blockchain technology) for immutable data logging.
- **Tech:** Node.js, Angular, AWS Lambda, PostgreSQL, Nest.js.

Iron Systems India Pvt. Ltd. | Principal Software Engineer

Noida | Sep 2019 – June 2020

- Led full-stack development for globalized messaging and image optimization engines.
- **Tech:** Node.js, Loopback, MySQL, Ionic, Android.

Agreeya Solutions | Lead Consultant

Noida | July 2017 – July 2019

- Architected enterprise frameworks for expense management, 2FA security, and dynamic survey generation.
 - **Tech:** Ionic, React, Angular, .Net.
-

Earlier Career Summary (2010 – 2017)

- **R Systems International (Senior SE):** Developed hybrid mobile applications and integrated complex Google Maps routing and OAuth security.
 - **Infogain India (Assistant Consultant):** Contributed to the MagicBricks Android ecosystem, focusing on search-buy-rent modules.
 - **HCL Technologies (Member Technical Staff):** Developed communication frameworks for NTT Docomo and Western Union; specialized in performance analysis and SQLite optimization.
 - **Magic Software (Software Engineer):** Research & Development of eBook engines and cross-platform automation tools using Java and Shell Scripting.
-

Education & Certifications

- **MCA** | AIT, Greater Noida (UPTU)
 - **B.Sc.** | Lucknow University
-

Certifications

- IBM - Back-End Development
- IBM - Data Science
- IBM - RAG and Agentic AI
