Professional Summary

AI Engineer & Data Analytics Specialist with 16 years of experience, including 10 years dedicated to enterprise mobile application ecosystems and cross-platform architecture and 6 years into Full stack JavaScript Developer. Specializing in the MERN stack, cloud-native architectures, and autonomous workflows. Proven track record of architecting high-performance distributed systems, robust backends (Node.js, Nest.js), and dynamic, responsive frontends (React, Angular). Strong expertise in AWS ecosystem, performance engineering, and relational/NoSQL database management. Proven track record in designing high-performance data pipelines, predictive models, and interactive data visualization systems (Power BI, Python/Pandas). Expert at integrating Agentic AI, RAG frameworks, and advanced analytics to optimize supply chain, logistics, and corporate operations. Adept at transforming raw, multi-source enterprise data into clear, executive-ready dashboards and real-time analytical tools.

Technical Skills

- **Databases & Caching:** PostgreSQL, MySQL, MongoDB, Redis, Amazon QLDB (Ledger)
- **Core Languages & Back-end:** Python, SQL, JavaScript (ES6+), TypeScript, Node.js, Nest.js, Express.js
- **AI & Advanced Analytics:** LangChain, CrewAI, LangGraph, Retrieval-Augmented Generation (RAG), Data Analytics, Vector Databases (Pinecone, ChromaDB)
- **Cloud & DevOps:** AWS (Lambda, API Gateway, EC2), Docker, CI/CD pipelines, Git, Linux
- **Mobile / Legacy:** Android (Java), Ionic, Cordova

Professional Experience

ITC Infotech | Lead Consultant

Noida, India | February 2023 – February 2026

- Architected and deployed enterprise Supply Chain Systems (DSCS) utilizing Python, SQL, and Node.js, optimizing data ingestion and material allocation tracking accuracy across global operations.
- Engineered high-performance data filtering engines and decoupled heavy application modules, reducing query latency and boosting system-wide responsiveness for real-time data visualization.
- Integrated Single Sign-On (SSO) for secure, centralized user authentication across the SCVitals application framework.

- Built and maintained end-to-end predictive analytics pipelines and interactive dashboards to forecast logistics bottlenecks, translating complex data models into actionable visual suggestions for executive stakeholders.
- **Environment:** React, Redux, Node.js, SQL, Redis, Python, FastAPI, Django, REST APIs, Git.

Assimilate Solutions | Senior Software Engineer

Noida, India | February 2021 – January 2023

- Designed and implemented serverless data architectures using AWS Lambda and Node.js to automate real-time product health-monitoring and telemetry data collection.
- Developed immutable database schemas using Amazon QLDB to ensure tamper-proof audit logging and historical data tracking for compliance analytics.
- Built modular web components and data-heavy administrative dashboards using Nest.js and Angular to visualize operational metrics and enterprise KPIs.
- **Environment:** Node.js, Angular, AWS Lambda, PostgreSQL, Nest.js, Amazon QLDB.

Earlier Career Summary into Mobile Application Development (2010 – 2020)

- **Iron Systems India Pvt. Ltd. | Principal Software Engineer:** Led full-stack engineering for a globalized messaging system and automated image optimization engines using Node.js and Loopback. Optimized mobile delivery paths by integrating legacy Android and Ionic frameworks, achieving significant application performance improvements.

Environment: Node.js, Loopback 3.0, MySQL, MongoDB, Ionic, Typescript, Android, iOS
- **Agreeya Solutions | Lead Consultant:** Architected enterprise-grade web frameworks for core operational modules, including expense management systems, dynamic survey engines, and 2FA security protocols

Environment: React, Angular, Ionic, Node.js, .NET
- **R Systems International (Senior Software Engineer):** Developed hybrid mobile applications, implementing advanced Google Maps routing and OAuth security integrations.

Environment: JavaScript, JSX, Webpack, Node.js, Linux, Genbox, Ionic, Android, React.js
- **Infogain India (Assistant Consultant):** Contributed to the core MagicBricks Android ecosystem, engineering search-buy-rent features to scale user traffic.

Environment: Android, Java
- **HCL Technologies (Member Technical Staff):** Programmed communication frameworks for global clients (NTT Docomo, Western Union); optimized SQLite database performance.

Environment: Android, Java, HTML5, CSS3, JavaScript, AngularJS, jQuery, jQuery-mobile, PhoneGap, SQLite, J2EE, MongoDB, Apache Felix, SVG, WI-FI Commander, WinSCP, Putty, Ikivo, SVN, MKS

- **Magic Software (Software Engineer):** Managed R&D for cross-platform eBook engines and automation tooling using Java and Shell Scripting.

Environment: Android, Java, JavaScript, jQuery, jQuery-mobile, PhoneGap, Sencha Touch, iOS, Flex, ActionScript 3.0, Shell Script, SQL, SVN

Projects

Autonomous Supply Chain Intelligence Agent

- Developed an Agentic AI workflow using Python, CrewAI, and Pandas to orchestrate multi-agent web scraping and reasoning loops, processed and structured unstructured global logistics data to forecast and visually categorize supply chain "Hold" trends.

Intelligent PDF Insight & Compliance Engine

- Architected a Retrieval-Augmented Generation (RAG) pipeline utilizing Node.js, Python, and LangChain to parse complex legal documentation, extracting key compliance metrics and synthesizing data into structured visual charts and summaries for leadership.

Education

- Master of Computer Applications (MCA) | AIT, Greater Noida (UPTU) in 2010
- Bachelor of Science (B.Sc.) | Lucknow University in 2007

Certifications

- IBM Certified Back-End Developer
- IBM Certified Data Scientist
- IBM Certified RAG and Agentic AI Specialist
